

**Installation Service**

Simply call your local ShadeNext™ distributor for a free, no-obligation measure and quote. Your ShadeNext™ blinds will be custom manufactured and expertly fitted to your home with a 5 year professional installation warranty for genuine peace of mind.

**Truly Australian**

ShadeNext™ are proudly Australian owned, Australian designed, and Australian made, with registered designs and patents pending. At least 80% of all ShadeNext™ componentry is sourced from Australian producers while all fabrics are sourced from the highest quality suppliers in Europe and Asia.

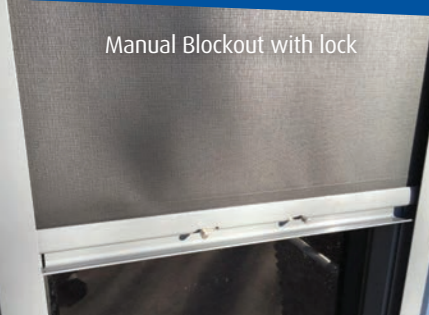

**ShadeNext™ Warranty Protection**

Enjoy the peace of mind of a locally backed warranty on all ShadeNext™ blinds.

- 5 Year Parts & Materials Factory Warranty,
- 5 Year Installation Warranty, when installed by approved ShadeNext™ installer,
- 5 Year Motor Warranty when the motorised option is selected.

**Office & Commercial**

ShadeNext™ blinds are the ideal combination of privacy, light control and energy-efficient cooling for cafés, low-rise apartments or offices. Available in a staggering range of colours and grades of blockout, in durable and printable fabrics. Fabrics can be easily changed too, some customers have requested a summer set for high blockout, and a winter set for daytime privacy. The perfect solution to overhaul or enhance any commercial project.

## Simple & Reliable

### Customised and Fully Installed

All of our blinds are custom made and installed by local distributors who offer a 5 year installation warranty, or you may choose to install them yourself.

### Hassle-free Aluminium and Stainless Steel

ShadeNext™ components are made from non-rusting, maintenance-free Aluminium and Stainless Steel. The self-retracting spring is made from long life spring steel and housed in a weather tight aluminium tube.

### Wind Safe

When installed adjacent to a window frame, the unique low profile design and unrestrained sides of the ShadeNext™ blind allow air to be vented safely, minimising 'ballooning' of the fabric.

*(Please note that all outdoor blinds should be retracted during extreme weather and during extended absences to avoid damage to blinds or property.)*

### Easy Remote Control

For the ultimate in ease, ShadeNext™ blinds can be motorised with a simple-to-operate remote control. Up to 16 blinds can be operated from the one (replaceable) remote. Alternately, the blinds can be installed with self-retracting springs and operated manually.

## Smart Lifestyle Investment

### Affordable Solution

The unique design and factory efficient supply of the ShadeNext™ blinds means they are among the most affordable exterior window blinds available. With modern materials and intelligent design, yet at prices similar to 1980's style canvas awnings, you can enjoy outstanding value.

### Energy Efficient Cooling

Cool your home by degrees in summer and reduce your air conditioning bills. The adjustable ShadeNext™ blinds offer you outstanding shade protection and can be partially retracted so you can take advantage of cooling breezes, for an even more comfortable home.

### Excellent UV Protection

All ShadeNext fabrics offer a very high level of UV blockout to protect your furnishings and family from damaging UV radiation. Safeguard your considerable investments in curtains, carpets, furniture, and flooring all year round with ShadeNext's excellent protection.

## Stylish Range of Options

### Stunning European Colour Range

With over 50 fabric colours and types to choose from, any home décor can be enhanced with beautiful, high performance ShadeNext™ blinds. Whether you are looking to contrast or complement existing colours, or achieve a bold make-over, there is sure to be a colour in our range to make your home look stunning.

### Perfect Combination of Privacy and Shading

All open weave ShadeNext™ fabrics offer you an optimised combination of protective shading, excellent visibility, and daytime privacy. So you can enjoy the cool indoors while watching the family in the garden, in comfortable privacy. Stylish full blackout fabrics are also available, excellent for shift workers or baby's rooms.

### Fits most window types

ShadeNext's clever low profile design is compatible with most window styles and frames. The shape and size of each blind is customised and manufactured to your specific requirements. So whether you have sliding windows, casement or sash windows, or many other varieties, ShadeNext™ has you covered.
