

Extend your Lifestyle®
Sundream™ Compact

Conservatory Awning - Standard and Zip

The Sundream Compact is a stylish, contemporary conservatory awning designed for mounting above glass roofs or pergolas. The awning uses high grade materials of uncompromising quality designed for demanding residential and commercial applications. The streamline system enables a compact installation whilst providing optimal protection for the fabric and operating mechanism against dirt, rain and humidity.

The Sundream Compact is a highly versatile awning which runs in robust extruded aluminium guide rails that are designed for durability and maintenance free operation.

The internal roller system has two heavy duty spring units that are increasingly loaded while the awning extends, so that the cover is always being kept under tension, ensuring its smooth operation.

The Sundream Compact is available in two fabric guidance models: **Standard or Zip.**

The 'Zip' mechanism design eliminates any gap between the fabric and guiderail, so optimising the sunshade coverage.

Awnings can extend up to 6m in width and 5m in projection (up to 20m²). All awnings are motorised and powdercoated to your choice of colour.

CARE: The Sundream Compact is designed as a sunshade system. Although the acrylic canvas fabric can withstand light to heavy rain, this may result in water pooling that may stretch the fabric over time.
